THE PM84 STANDARD ARK-125

The PM84 standard trolley is the most popular in the PLATE MATE range. The undercarriage and the swivel wheels, two with brake, are stainless steel. The total height is 185cm. It is possible to shorten the cart. Taking up only 0,36 square meters and accommodates up to 84 plates. The PLATE MATE is sometimes called "The waiter with 84 arms". The trolley can be easily moved by one person, to a storage or service location. Even a doorway is no problem for the PLATE MATE full of plates. We are sure that you will save lots of time and space with the PLATE MATE.

THE PM168 TWIN ARK-180

The PM168 TWIN is the biggest space saver of our PLATE MATE range. the columns can turn independently of each other in the frame, full of plates with a diameter of up to 33cm. Corrosion resistant materials are used in the construction. The frame and the swivel wheels, two with brake, are made from stainless steel. You will find that these models are available in three versions.

PM 96 TWIN, capacity for 96 plates, height 138cm ARK-160.
PM 120 TWIN, capacity for 120 plates, height 158cm ARK-170.
PM 168 TWIN, capacity for 168 plates, height 186cm ARK-180.

A protective covering is available for every Twin model.
