Our smallest Plate Mate can be your biggest help!

The PLATE MATE wall models have been especially designed for very small kitchens or food prep rooms. To maximize counter utility, several wall models can be mounted next to each other and can also hold trays. The models are supplied in three types:

WM 6 Capacity for 6 plates, height 57cm ARK-370.

WM 9 Capacity for 9 plates, height 77cm ARK-360.

WM12 Capacity for 12 plates, height 99cm ARK-350.

You can attach the wall models permanently to the wall, but they can also be attached to a stand-alone holder which can then be hung on the wall.
