Self Levelling Tray and Rack Dispensers

Tray and Rack dispensers are available in 3 different configurations, Mobile Cabinet, Mobile Cantilever, and Drop-in mechanism only. Both the cabinet and cantilever units can be fitted with a silverware dispenser. Drop-in units are used where the dispenser is to be incorporated into a bench top.

When ordering your tray dispenser tell us what style of dispenser you require and the size of your tray or rack. Adjustment of the self levelling feature is done by adding or removing springs.

Cantilever dispensers come with corner buffers and 2 brake castors as standard.
